## SKILLS

- Scala and Play Framework
- Vanilla JavaScript (ES6)
- HTML5 & CSS3
- Linux system
- Git
- Bug fixing
- Curious, dedicated and passionate
- Self-motivated
- Strong verbal communication
- Attention to detail
- Teamwork skills
- Agile workflow
- Tech community engagement

**Exposure to:**
- Node and Vue
- AWS
- Terraform

## PROFESSIONAL SUMMARY

An enthusiastic and self-taught junior software engineer who is continually improving a powerful set of skills, with strong interest in self-development, learning and software engineering. A team driven person who loves pair programming, believes in testing, and is grateful for the exposure of different technologies and looking to focus on one to gain mastery. Currently seeking a position where it's possible to keep going to grow the current knowledge and contribute, a company which share the same values: engineering drive, environment friendly, LGBTQ+, feminist.

## WORK HISTORY

**Royal Pharmaceutical Society - Junior Software Engineer**
*London, United Kingdom • 01/2020 - Current*

**Development and implementation:**
- Contributed to the *Text-Service project* using *postman* and *Vue.js:* The Text Service allows Editorial to create and update long-form text records. The front-end for Text Service consists of a user interface and a number of back-end services.

- Contributed to the SpineFacade project using Scala and Play: The SPINE Editor role is to provide a simpler, domain-centric interface to the SPINE content as well as to protect the architecture from some of the risks associated with licensing third party technology.

- Facilitated the Scala Study Group and tutoring intern developers

- Created high-quality code by commitment to practices such as tech-driven development, pair programming and code review. Wrote unit tests with ScalaTest and ran with SBT/IntelliJ

- Communicated technical information to non-technical people eg. stakeholders using demos

- Discussed project progress with senior colleagues, collected feedback on different stages and directly addressed concerns.

- Contributed to daily scrum meetings with team updates.

- Jira
- C#
- Python
- Jenkins
- Docker
- Windows UWP
- Angular
- Selenium Web driver
- Mentoring and tutoring

## EDUCATION

**FreeCodeCamp**
Online • 09/2018

**Udacity**
Online • 2018
*Front End Web Developer Nanodegree* : Front End

**Codecademy**
Online • 2017
- Plus [CodeWars](#)

**School Margherita Di Savoia**
Rome, Italy • 2013
*High School Diploma*

Change and transformation:
- Collaborated with senior team members on defined projects, collected feedback on different stages, directly addressed concerns and ensured that status is adequately communicated

Delivery and operation:
- Overseed the resolution and follow-up of problems and incidents. I was part of a team that provides out-of-hours on-call support

### Kano Computing - Junior Software Engineer
*London, United Kingdom • 03/2019 - 01/2020*

- I worked in the Systems scrum team delivering updates for Kano OS to our 100,000+ users.
- I prototyped and helped develop the new software for the new Windows-based product.
- Throughout this, in addition to building on my JS and front-end skills, I was exposed to many different technologies in order to support releases, including C#, Python, Terraform.
- I developed demos for a Windows SSO system creating a PWA to integrate a web sign-in with our UWP apps.
- I implemented integration tests and added benchmarking tools for our Make Art website using Selenium.

### Kano Computing - Junior Frontend Engineer
*London, United Kingdom • 10/2018 - 3/2019*

- I worked in the Services team to support the lead e-commerce engineer with sales page updates, and assisting with building out the CMS.
- During this time I prototyped and built some CMS 's sections coming from our specialized design team, using Django and python and Docker to run it.

Projects Portfolio Selection my personal projects:
- [FFC WIKY Only Vanilla JS](#) Wikipedia Viewer app 2/2018.
- [Pink Portfolio 3/2018.](#)
- [Project-2 Udacity Portfolio Site](#): a responsive portfolio - 4/2018.
- [Project-4 Memory Game](#) A simple basic matching game to test the player's memory 5/2018.
- [Weather App project](#) PRO 9/2018 website that shows the real-time weather for a location of your choice.

### Mementum code - Mentor Volunteer
*Liverpool, United Kingdom • 09/2018 - 09/2018*

- Mentor for beginners (programming) Event: The World Transformed festival at Mementum code Dates volunteered: 22nd - 25th September 2018 Liverpool I was

helping as a volunteer mentor for programming in the beginner's sessions at momentum code.

**Codebar** - **Mentor Volunteer**
*London, United Kingdom • 06/2018 - 06/2019*

- Provided immediate support to questions from students.

**REFERRALS: CONTACT DETAILS AVAILABLE ON REQUEST**

Tom Bettany - Software Development Manager at Kano Computing
Mal Minhas - VP of Engineering at Karhoo
Alex Burr - Software Engineer at Kano Computing
